

Marine & Bunker Fuel

At Maverick Energy DMCC, we understand the critical importance of reliable and efficient marine fuels in keeping the global maritime industry afloat. With our five decades of global experience in the energy sector, we have established ourselves as one of the leading suppliers of high-quality marine and bunker fuels in Dubai and the GCC region. Our extensive product range caters to the diverse needs of the maritime industry, ensuring optimal performance and compliance with stringent environmental regulations.

We offer a comprehensive selection of marine fuels, including various grades of intermediate fuel oil (IFO), marine gas oil (MGO), and low sulfur fuel oil (LSFO), each meticulously formulated to meet the specific requirements of different vessel types, such as cargo ships, tankers, and cruise liners.

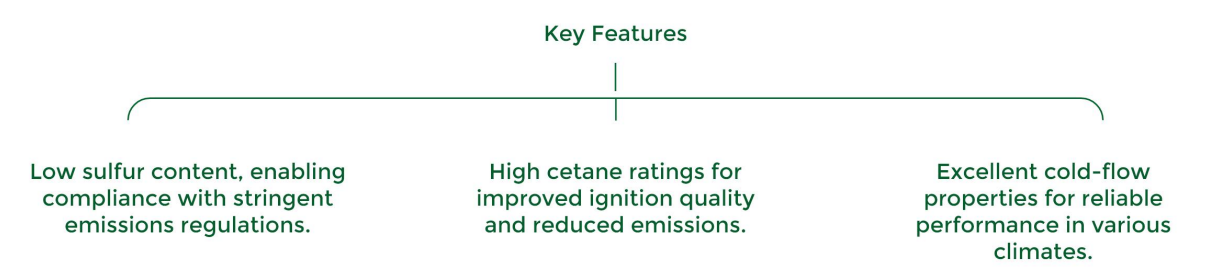

Intermediate Fuel Oil (IFO)

Our IFO products are designed to meet the demanding power requirements of large ocean-going vessels. Key features of our IFO include:

Marine Gas Oil (MGO)

Our MGO is a premium distillate fuel suitable for use in marine diesel engines and boilers. Our MGO products offer:

Low Sulfur Fuel Oil (LSFO)

In compliance with the International Maritime Organization's (IMO) 2020 sulfur cap, we offer LSFO products with a maximum sulfur content of 0.5% m/m. Our LSFO fuels provide:

Fuel Specifications and Quality Standards:

Our marine and bunker fuels undergo rigorous testing and quality control measures to ensure they meet or exceed industry specifications, such as ISO 8217 and MARPOL Annex VI. We prioritize performance characteristics like viscosity, flash point, and compatibility, ensuring safe and efficient operation of marine engines and systems.

Environmental Regulations and Bunkering Operations:

At Maverick Energy DMCC, we stay ahead of evolving environmental regulations, such as the IMO 2020 sulfur cap and the Energy Efficiency Design Index (EEDI). Our bunkering operations adhere to strict safety protocols and industry best practices, ensuring efficient and secure delivery of marine fuels to vessels worldwide.
